

Online Learning Platform

POA Learning's new online learning platform is available to learners for a period of one calendar month giving access to over 800 free non - accredited courses that can be completed online across a vast range of subjects as listed opposite.

Enrolment will be completed by the learners' local POA Learning Centre and completion of an initial assesment will be required on first login for access to be granted.

At the end of the month, access will be automatically removed, but an extension can be considered for the learner upon request.

The courses are video based, with blended resources available and a certificate produced upon completion.

For more information, or to request enrolment, please contact your local POA Learning Centre - details can be found at:
